

Μάθημα Ζεργίας Τριγωνομετρίας Όρια

Εσώ ωςών οι παραπόμενες απειλές σχετικάς

$$i) |\operatorname{Inpx}| \leq |x| \quad \forall x \in \mathbb{R}$$

$$ii) \lim_{x \rightarrow x_0} n\mu x = n\mu x_0 \quad \text{και} \quad \lim_{x \rightarrow x_0} \omega x = \omega x_0$$

$$iii) \lim_{x \rightarrow 0} \frac{n\mu x}{x} = 1$$

$$iv) \lim_{n \rightarrow \infty} \frac{n\mu n}{n} = 1$$

$$v) \lim_{x \rightarrow 0} \frac{\omega x - 1}{x} = 0$$

1ο Λύτρο Ιταράς

$$\text{Υποδοχής το οριό} \quad \lim_{x \rightarrow \pi} \frac{\omega^2 x + \omega x}{n\mu^2 x}$$

Λύση

$$\lim_{x \rightarrow \pi} \frac{\omega x (\omega x + 1)}{1 - \omega^2 x} = \lim_{x \rightarrow \pi} \frac{\omega x (\omega x + 1)}{(\omega x - 1)(\omega x + 1)} = \lim_{x \rightarrow \pi} \frac{\omega x}{1 - \omega x}$$

$$= \frac{-1}{1 - (-1)} = -\frac{1}{2}$$

2º Lásero Tapón

Analogie zu $\lim_{x \rightarrow 0} \frac{\omega^2 x - \sqrt{\omega^2 x}}{n\mu^2 x}$

Laser

$$(*) \omega^2 x = \omega^2 x - n\mu^2 x \quad (*)$$

$$\lim_{x \rightarrow 0} \frac{(\omega^2 x - \sqrt{\omega^2 x})(\omega^2 x + \sqrt{\omega^2 x})}{n\mu^2 x (\omega^2 x + \sqrt{\omega^2 x})}$$

$$= \lim_{x \rightarrow 0} \frac{\omega^4 x - \omega^2 x}{n\mu^2 x (\omega^2 x + \sqrt{\omega^2 x})}$$

$$= \lim_{x \rightarrow 0} \frac{\omega^4 x - \omega^2 x + n\mu^2 x}{n\mu^2 x (\omega^2 x + \sqrt{\omega^2 x})}$$

$$= \lim_{x \rightarrow 0} \frac{\omega^2 x (\omega^2 x - 1) + n\mu^2 x}{n\mu^2 x (\omega^2 x + \sqrt{\omega^2 x})}$$

$$= \lim_{x \rightarrow 0} \frac{-\omega^2 x n\mu^2 x + n\mu^2 x}{n\mu^2 x (\omega^2 x + \sqrt{\omega^2 x})}$$

$$= \lim_{x \rightarrow 0} \frac{n\mu^2 x (1 - \omega^2 x)}{n\mu^2 x (\omega^2 x + \sqrt{\omega^2 x})}$$

$$= \frac{0}{2} = 0$$

Algebra Tapastīgumā

① Na viedojir za opār

$$\lim_{x \rightarrow 0} \frac{\omega x - n\mu x}{\omega^2 x}$$

$$\lim_{x \rightarrow 0} \frac{n\mu x \cdot \omega x}{n\mu x + \omega x - 1}$$

$$\lim_{x \rightarrow 0} \frac{\omega x - \sqrt{\omega^2 x}}{n\mu^2 x}$$

$$\lim_{x \rightarrow 0} \frac{n\mu^2 x + 4\omega x}{n\mu^2 x + \omega x}$$

② Vnologijs tie za opār

d) $\lim_{x \rightarrow 0} \frac{\omega^2 x}{n\mu^2 x - n\mu x}$

b) $\lim_{x \rightarrow 0} \frac{n\mu^2 x}{n\mu^3 x + \omega^2 x - 1}$

g) $\lim_{x \rightarrow 0} \frac{1 + \omega x}{e^{\varphi x}}$

~~$\lim_{x \rightarrow 0} \frac{1 + \omega x}{e^{\varphi x}}$~~

g) $\lim_{x \rightarrow 0} \frac{e^{\varphi x}}{x}$
