

The screenshot displays the Alice 3.7 software interface. At the top, the title bar shows the file path: "Alice 3.7 C:\Users\penel\Documents\ALICE\MyProjects\horse.a3p". Below the title bar is a menu bar with "File", "Edit", "Project", "Run", "Window", and "Help".

The main window is divided into several sections:

- 3D Scene:** A top-left window showing a 3D environment with a horse on the left and a pond in the center. A "Run..." button is visible in the top right of this window, and a "Setup Scene" button is at the bottom right.
- Object Properties:** A dropdown menu below the scene shows "this.pond" selected.
- Procedures:** A section titled "Procedures" and "Functions" with a "group by category" dropdown. It lists categories like "Pond" and "Prop" with their respective "Editable Procedures".
- Procedural Editor:** A large right-hand window titled "Scene" and "myFirstMethod". It contains a "do in order" block with several procedures:
  - `this.horse think` with text "Μμμμ... Ωποια λιμνη!!!"
  - `this.horse moveToward` with target `this.pond` and amount `1.0`
  - A `do together` block containing:
    - `this.horse getNeck` followed by `turn FORWARD` with amount `0.25`
    - `this.horse getNeck` followed by `turn BACKWARD` with amount `0.125`
  - `this.horse getTail2` followed by `roll RIGHT` with amount `2.0`
  - `this.horse getNeck` followed by `turn FORWARD` with amount `0.25`
  - `this.horse getNeck` followed by `turn BACKWARD` with amount `0.25`

- Bottom Panel:** A taskbar at the bottom of the screen with a search bar labeled "Αναζήτηση" and various application icons.
