

Κάνω τις πράξεις με τη βοήθεια της αριθμογραμμής.

α)  $12.840 + 573 = \dots\dots\dots$

β)  $13.070 + 1.782 = \dots\dots\dots$

γ)  $14.810 + 3.832 = \dots\dots\dots$

Υπολογίζω με τον νου και γράφω μόνο το αποτέλεσμα.

α)  $12.120 + 70 = \boxed{\phantom{00000}}$

β)  $13.420 + 130 = \boxed{\phantom{00000}}$

γ)  $13.050 + 680 = \boxed{\phantom{00000}}$

δ)  $15.480 + 270 = \boxed{\phantom{00000}}$

ε)  $17.580 - 90 = \boxed{\phantom{00000}}$

στ)  $16.250 - 370 = \boxed{\phantom{00000}}$

ζ)  $13.510 - 850 = \boxed{\phantom{00000}}$

η)  $14.730 - 670 = \boxed{\phantom{00000}}$

Συμπληρώνω τα κενά.

α)  $12.000 = 11.400 + \boxed{\phantom{00000}}$

β)  $12.000 = 3 \times \boxed{\phantom{00000}}$

γ)  $12.000 = 17.000 - \boxed{\phantom{00000}}$

δ)  $12.000 = 6.000 \times \boxed{\phantom{00000}}$

ε)  $16.860 = 18.000 - \boxed{\phantom{00000}}$

στ)  $16.860 = 14.100 + \boxed{\phantom{00000}}$

ζ)  $16.860 = 2 \times \boxed{\phantom{00000}}$

η)  $16.860 = 17.100 - \boxed{\phantom{00000}}$
